

Hello Elisa,

I am really interested in this Design Trainee position with Elisa's Software Services - Design System team. As a 2nd year computer applications student at Häme University of Applied Sciences, I have been introduced to Figma as part of my courses, and I am excited to explore this field further through this employment opportunity.

As part of my courses, I have designed website prototypes and layouts using Figma, and have gained an understanding of the basics of user interface and visual design. I am eager to expand my knowledge in this area, and have taken an additional Udemy course to deepen my understanding of UI/UX design. Moreover, being a computer applications major, I have had opportunities to learn programming languages, as well as work with tools such as Jira, which I believe would be valuable in this role.

In addition to my technical skills, I have gained experience working in teams through various projects at my university, as well as through volunteering. These experiences have helped me develop effective communication and collaboration skills, which I believe would be essential in this role.

Overall, I am really interested and excited about the possibility of joining your team and contributing to the Elisa. Thank you for considering my application.
